Phone validation is not working

Customer id is not showing on logout

Note that:

- Your project **MUST** run on **mercury**. You may get **0 mark** if your project 2 cannot work on mercury. A wrong URL may also result in your project 2 cannot work on mercury.
- Your data files *customer.xml*, *goods.xml*, *manager.txt*, must be put under your *~/www/data/* directory, otherwise **20 marks** will be deducted.
- If your *manager.txt* is not provided, Task 5 cannot be performed so that you will lose **whole marks for Task 5**.
- All your program files used for the project should be put in *~/Project2* directory on mercury as required, otherwise **20 marks** will be deducted.
- This directory “Project2” should contain no *index.htm* file. Any file affects the timestamps of files under Project2 to be shown up, **20 marks** will be deducted.
- All program files should put your name and student ID on the top using comments; if you fail to do so, 2-10 marks will be deducted (**2 marks** will be deducted for each file, maximum deduction will be **10 marks** for all files).
- After submission, you are not allowed to change any of the submitted files in the Project2 directory on your mercury account; any changes will result in timestamps changed and late submission penalty will apply.
